

## Special Issue

# Urban Pest Management from the 2018 NCUE

### Message from the Guest Editors

The discipline of urban entomology encompasses a wide range of topics related to management of pests in and around buildings. The stakeholders in the urban entomology community include property owners, pest management professionals, regulatory officials, professional associations, manufactures of tools and products, and academicians (both research and outreach). This special issue welcomes contributions from any and all urban stakeholders on topics related to the identification, biology, and management of arthropod and vertebrate pests in the built environment as well as regulation, training, and education on pest management in the indoor biome.

## About the Journal

### Message from the Editor-in-Chief

Arthropods are a diverse and abundant group of animals that are important to a variety of research dictates. For example, hexapods act as bio-indicators of ecosystem function and pest status and serve as model systems for questions concerning physiology, embryology, genetics, and social interaction. The editorial board and staff at *Insects* is committed to providing contributors an open access forum to showcase objective and innovative research as well as succinct review articles. Our journal is dedicated to providing timely and thorough review of qualified submissions and we welcome you to submit a contribution.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, GEOBASE, PubAg, and other databases.

#### Journal Rank:

JCR - Q1 (Entomology) / CiteScore - Q1 (Insect Science)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
