

Special Issue

Advances in Urban Pest Management in Europe

Message from the Guest Editor

We are pleased to invite you to submit original research articles or reviews for the Special Issue “Advances in Urban Pest Management in Europe”. The domestic and peri-domestic environment in European cities provides harborage and food for insects and other arthropods which are considered pests, either because they bite, sting, suck blood, transmit parasites and pathogens, contaminate food, damage wood or fabrics, or because they induce allergies or entomophobia. This Special Issue aims to report recent advances in urban pest management strategies against household and structural pest insects and other arthropods encountered in Europe, including synthetic insecticides and repellents, insecticide resistance management, botanical, microbial and biological control agents, nanotechnology, attract and kill strategies, transgenic and biotechnological control methods, sterile insect technique, modified atmospheres, and others. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Arthropods are a diverse and abundant group of animals that are important to a variety of research dictates. For example, hexapods act as bio-indicators of ecosystem function and pest status and serve as model systems for questions concerning physiology, embryology, genetics, and social interaction. The editorial board and staff at Insects is committed to providing contributors an open access forum to showcase objective and innovative research as well as succinct review articles. Our journal is dedicated to providing timely and thorough review of qualified submissions and we welcome you to submit a contribution.

Editor-in-Chief

Prof. Dr. Brian T. Forschler

Department of Entomology, University of Georgia, 413 Biological Sciences Building, Athens, GA 30602-2603, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, GEOBASE, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Entomology) / CiteScore - Q1 (Insect Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
