

Special Issue

Selected Papers from the 15th Workshop of the European Cyclotron Network (CYCLEUR 2023)

Message from the Guest Editors

The 15th Workshop of the European Cyclotron Network (CYCLEUR) will take place in Bucharest (Romania) on 22–23 June 2023. After the last edition before the COVID-19 pandemic in Dresden (2019), this event will reassemble again major experts in the field of cyclotrons, radioisotope production, targets, and target chemistry. In recent years, significant advances have been made in these fields and novel instruments and methodologies have been developed with direct implications for science and society. In particular, the production of radioisotopes for both medical diagnostics and therapy—so-called “theragnostics”—received a boost that is producing a breakthrough in nuclear medicine. This Special Issue is intended to collect original scientific contributions on the latest developments on cyclotrons and related topics, and in particular, on their applications in medicine and multidisciplinary research.

Guest Editors

Prof. Dr. Saverio Braccini
Prof. Dr. Francisco Alves
Dr. Dana Niculae

About the Journal

Message from the Editor-in-Chief

The realization of dedicated instrumentation has always been a collateral aspect of experimental research. In addition, many groups dedicate efforts and resources solely to the development of new devices, sensors, equipment and large infrastructure, theoretical and numerical studies, and novel experimental methodologies. With *Instruments* we wish to address both established and emerging communities, also to favor the creation of innovative trans-disciplinary approaches. We see *Instruments* as an exciting high-impact journal that will soon hold a leading position in disseminating cutting edge scientific and technological research.

Editor-in-Chief

Prof. Dr. Antonio Ereditato

Enrico Fermi Institute, The University of Chicago, Chicago, IL 60637,
USA

Author Benefits

High Visibility:

indexed within ESCI (Web of Science), Scopus, Inspec, CAPIus / SciFinder, INSPIRE, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 22.8 days after submission; acceptance to publication is undertaken in 3.9 days (median values for papers published in this journal in the second half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
