

Special Issue

Innovative Instrument Setting and Software Development for Organismic Biology and Behavior Analysis

Message from the Guest Editor

We are excited to invite you to contribute to a Special Issue of *Inventions* dedicated to showcasing cutting-edge innovations in the field of new instrument and software development for organismic biology and behavior analysis. In recent years, there have been remarkable advances in technologies and methodologies that have revolutionized our understanding of organisms and their behaviors. This Special Issue aims to bring together researchers, scientists, and experts from diverse backgrounds to explore these groundbreaking inventions and their applications in the context of organismic biology and behavior analysis, especially those with a focus on new innovative instrument settings and software development. We are seeking original research papers, reviews, and methodological studies that highlight novel inventions, tools, and techniques with the potential to transform our ability to study and interpret the physiology and behaviors of organisms, from microorganisms to complex ecosystems. Contributions are encouraged from fields such as genetics, neuroscience, ecology, ethology, and computational biology, among others.

About the Journal

Message from the Editorial Board

The unique journal *Inventions* is different from all other journals. Many scholars spend their lives publishing research papers in many different journals, but most of these journals do not help scholars collate and analyze their results or assist in promoting them to a relevant industry. However, *Inventions* will help authors not only to publish their papers in the journal, but also to promote their research results to industry and assist them in realizing the purpose of technology transfer. In the future, *Inventions* will help authors to evaluate their technology license fees based on the valuation theory and approaches and also help authors to show their patents and technologies on a network transaction platform.

Editors-in-Chief

Prof. Dr. Chien-Hung Liu

Department of Mechanical Engineering, National Chung Hsing University, 250 Kuo Kuang Rd., Taichung 402, Taiwan

Prof. Dr. Shouu-Jinn Chang

Department of Electrical Engineering, National Cheng Kung University, Tainan 701, Taiwan

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.8 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
