

Special Issue

Fluid Mechanics and Transport Phenomena

Message from the Guest Editors

Fluid mechanics and transport phenomena play a crucial role in energy conversion and management, with wide applications such as in fluid machineries, chemical processes, heat exchangers, energy transmission, biomechanical engineering, agricultural engineering, cooling of electric and electronic devices, buildings, and renewable energy systems. This Special Issue is dedicated to current advancements in theoretical, experimental, and numerical studies of single and multiphase flows, which are of significance for the science of industrial and environmental applications. Papers addressing the latest developments in computational fluid dynamics (CFD) and experimental methods for investigating fluid flows involving transport phenomena are also of interest.

Guest Editors

Prof. Dr. Shyy Woei Chang

Department of System and Naval Mechatronic Engineering, National Cheng Kung University, No. 1, University Road, Tainan City 701, Taiwan

Prof. Dr. Pey-Shey Wu

Department of Mechanical and Automation Engineering, Da-Yeh University, No. 168, University Road, Dacun Changhua 51591, Taiwan

Deadline for manuscript submissions

About the Journal

Message from the Editorial Board

The unique journal *Inventions* is different from all other journals. Many scholars spend their lives publishing research papers in many different journals, but most of these journals do not help scholars collate and analyze their results or assist in promoting them to a relevant industry. However, *Inventions* will help authors not only to publish their papers in the journal, but also to promote their research results to industry and assist them in realizing the purpose of technology transfer. In the future, *Inventions* will help authors to evaluate their technology license fees based on the valuation theory and approaches and also help authors to show their patents and technologies on a network transaction platform.

Editors-in-Chief

Prof. Dr. Chien-Hung Liu

Department of Mechanical Engineering, National Chung Hsing University, 250 Kuo Kuang Rd., Taichung 402, Taiwan

Prof. Dr. Shouu-Jinn Chang

Department of Electrical Engineering, National Cheng Kung University, Tainan 701, Taiwan

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.9 days after submission; acceptance to publication is undertaken in 4.6 days (median values for papers published in this journal in the second half of 2025).
