

Special Issue

IoT and Energy Internet

Message from the Guest Editors

The Internet of Things (IoT) is a paradigm that converges a variety of physical, digital and virtual things through information networks, to smart environments, which cover energy, buildings, transport, cities, healthcare, etc. As an important application of IoT-enabled solutions, Energy Internet has become one of the most promising power distribution infrastructures to promote a revolutionary vision of the smart grid. The integration of energy systems, e.g. energy generation and delivery, management and consumption, with IoT architectures includes a great deal of heterogeneous devices, sensors, appliances, communication networks, information technologies, etc. introducing advanced improvements and opportunities, such as interoperability, responsiveness, robustness, advanced demanded side response, and energy efficiency enhancement. The aforementioned advantages and challenges demand extensive exploration and investigation in a cross-disciplinary field. This Special Issue aims to foster innovative research and state-of-the-art advances in new algorithms, control strategies, communication technologies and applications in IoT-empowered smart energy systems.

About the Journal

Message from the Editorial Board

The unique journal *Inventions* is different from all other journals. Many scholars spend their lives publishing research papers in many different journals, but most of these journals do not help scholars collate and analyze their results or assist in promoting them to a relevant industry. However, *Inventions* will help authors not only to publish their papers in the journal, but also to promote their research results to industry and assist them in realizing the purpose of technology transfer. In the future, *Inventions* will help authors to evaluate their technology license fees based on the valuation theory and approaches and also help authors to show their patents and technologies on a network transaction platform.

Editors-in-Chief

Prof. Dr. Chien-Hung Liu

Department of Mechanical Engineering, National Chung Hsing University, 250 Kuo Kuang Rd., Taichung 402, Taiwan

Prof. Dr. Shouu-Jinn Chang

Department of Electrical Engineering, National Cheng Kung University, Tainan 701, Taiwan

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.8 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
