

## Special Issue

# Emerging Trends and Innovations in Renewable Energy

### Message from the Guest Editor

As has been established, renewable energy is abundant, and there remain vast areas on both land and offshore that can be considered for harvesting various kinds of energy. The technologies currently associated with renewable energy extraction are vital for achieving the expected targets in energy efficiency and environmental protection. For example, research into offshore wind has experienced outstanding success in recent decades and advances are also expected in other technologies. On the other hand, there remain important challenges related to the implementation of cost-effective technologies. From this perspective, the aim of this Special Issue is to contribute to the renewable energy agenda through enhanced scientific and multi-disciplinary works, aiming to improve knowledge, innovation and performance in harvesting renewable energy. We strongly encourage the submission of papers providing innovative technical developments, reviews, case studies, and analytics, as well as assessments and manuscripts targeting different disciplines; these must all be relevant to harvesting renewable energy and to the associated advances and challenges.

### Guest Editor

Prof. Dr. Eugen Rusu

Head of Laboratory of Computations and Modeling in Applied Mechanics, Department of Applied Mechanics, "Dunarea de Jos" University of Galati, 800008 Galați, Romania

### Deadline for manuscript submissions

31 August 2026

## About the Journal

### Message from the Editorial Board

The unique journal *Inventions* is different from all other journals. Many scholars spend their lives publishing research papers in many different journals, but most of these journals do not help scholars collate and analyze their results or assist in promoting them to a relevant industry. However, *Inventions* will help authors not only to publish their papers in the journal, but also to promote their research results to industry and assist them in realizing the purpose of technology transfer. In the future, *Inventions* will help authors to evaluate their technology license fees based on the valuation theory and approaches and also help authors to show their patents and technologies on a network transaction platform.

---

### Editors-in-Chief

Prof. Dr. Chien-Hung Liu

Department of Mechanical Engineering, National Chung Hsing University, 250 Kuo Kuang Rd., Taichung 402, Taiwan

Prof. Dr. Shouu-Jinn Chang

Department of Electrical Engineering, National Cheng Kung University, Tainan 701, Taiwan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.9 days after submission; acceptance to publication is undertaken in 4.6 days (median values for papers published in this journal in the second half of 2025).
