### **Message from the Guest Editor**

Dear Colleagues,

Hypertrophic cardiomyopathy is a heterogeneous clinical disorder with a variable morphologic expression and an increasingly recognized prevalence in the cardiovascular patient community. In the past decade, we have seen exponential growth in the available modalities for patient diagnosis and risk stratification, as well as in treatment options ranging from medical therapy to percutaneous and surgical interventions. The aim of this Special Issue is to highlight this progress from the perspective of international experts across multi-disciplinary modalities via review articles, brief editorials, case reports, or original research. We encourage all interested authors to submit their work and share their experiences of this growing and complex patient population.

Dr. Christos G. Mihos

## Message from the Editor-in-Chief

The primary goal of the *Journal of Cardiovascular Development and Disease (JCDD)*, ISSN 2308-3425) is to provide cardiovascular scientists a platform to publish their work in a quick and efficient way. Topics can range from studies designed to decipher the events underlying early heart development to studies focusing on the origins of congenital and acquired heart disease. Papers submitted to *JCDD* undergo a fast, yet thorough, peer-review process. In this process, we will apply strict ethical policies and standards. *JCDD* guarantees fast dissemination of results to a large scientific audience.

## Author Benefits

**Open Access:**— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (Cardiac and Cardiovascular Systems) / CiteScore - Q2 (General Pharmacology, Toxicology and Pharmaceutics)
