Acute Myocardial Infarction: Pharmacological and Interventional Treatment

Message from the Guest Editors

Acute myocardial infarction remains a major concern for the cardiologists and the modern societies, primarily due to its higher periprocedural mortality and the increased risk of long-term complications, such as congestive heart failure. The aim of this Special Issue is to provide a modern and detailed overview of current trends in the treatment of acute coronary syndromes. It offers a comprehensive review of interventional options and available pharmacological therapies. By addressing both clinical and technical perspectives, this issue aims to offer up-to-date knowledge and practical insights for enhancing patient care. Through this Special Issue, readers will gain a deeper understanding of the evolving strategies in the treatment of acute myocardial infarction, allowing them to better address the challenges posed by this life-threatening condition and ultimately improve patient outcomes.

About the Journal

Message from the Editor-in-Chief

The primary goal of the *Journal of Cardiovascular Development and Disease* (JCDD, ISSN 2308-3425) is to provide cardiovascular scientists a platform to publish their work in a quick and efficient way. Topics can range from studies designed to decipher the events underlying early heart development to studies focusing on the origins of congenital and acquired heart disease. Papers submitted to JCDD undergo a fast, yet thorough, peer-review process. In this process, we will apply strict ethical policies and standards. JCDD guarantees fast dissemination of results to a large scientific audience

Editor-in-Chief

Prof. Dr. Thomas Brand
National Heart & Lung Institute, Imperial College London, South
Kensington Campus, London SW7 2AZ, UK

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Cardiac and Cardiovascular Systems) /
CiteScore - Q2 (General Pharmacology, Toxicology and
Pharmaceutics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 28.8 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
