Congenital Heart Disease: The Effects of Social Determinants of Health on Burdens and Outcomes

Message from the Guest Editor

Congenital heart disease is the most common major congenital anomaly, and presents a lifelong condition. Globally, most children born with congenital heart disease do not have access to the care they require, whereas children and adults who receive care have different burdens, access and outcomes as a result of demographic, socioeconomic, systemic and geographical factors. This Special Issue will cover the global burden of congenital heart disease through the lens of social determinants of health. Articles may include, but are not limited to, congenital heart disease in low- and middle-income countries, small island states, and rural and remote communities, the effects of sociodemographic factors on access to and outcomes after care, and the effects of the environment on congenital heart disease.

About the Journal

Message from the Editor-in-Chief

The primary goal of the *Journal of Cardiovascular Development and Disease* (JCDD, ISSN 2308-3425) is to provide cardiovascular scientists a platform to publish their work in a quick and efficient way. Topics can range from studies designed to decipher the events underlying early heart development to studies focusing on the origins of congenital and acquired heart disease. Papers submitted to JCDD undergo a fast, yet thorough, peer-review process. In this process, we will apply strict ethical policies and standards. JCDD guarantees fast dissemination of results to a large scientific audience

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPLus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Cardiac and Cardiovascular Systems) /
CiteScore - Q2 (General Pharmacology, Toxicology and
Pharmaceutics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 28.8 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
