Coronary CT Angiography in Percutaneous Coronary Intervention (PCI) Planning: Advances, Applications, and Challenges

Message from the Guest Editor

Cardiac CT has grown at an incredible pace. With recent advances in cardiac CT, not only is it an excellent test with high negative predictive value, but it can provide vital information for patients where obstructive coronary artery disease has been detected and are being referred to the cardiac catheterization laboratory. In this Special Issue, we focus on the use of cardiac CT for procedural planning in the cath lab and showcase the many different ways CT can be utilized for this purpose.

About the Journal

Message from the Editor-in-Chief

The primary goal of the *Journal of Cardiovascular Development and Disease (JCDD, ISSN 2308-3425)* is to provide cardiovascular scientists a platform to publish their work in a quick and efficient way. Topics can range from studies designed to decipher the events underlying early heart development to studies focusing on the origins of congenital and acquired heart disease. Papers submitted to *JCDD* undergo a fast, yet thorough, peer-review process. In this process, we will apply strict ethical policies and standards. *JCDD* guarantees fast dissemination of results to a large scientific audience.

Editor-in-Chief

Prof. Dr. Thomas Brand

Kensington Campus, London SW7 2AZ, UK

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Cardiac and Cardiovascular Systems) /
CiteScore - Q2 (General Pharmacology, Toxicology and
Pharmaceutics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 24.7 days after submission; acceptance to publication is undertaken in 3.6 days (median values for papers published in this journal in the second half of 2025).
