

## Special Issue

# Diet and Cardiovascular Diseases—Current Views and Trends

### Message from the Guest Editors

Diet has a fundamental impact on cardiovascular health. Many cardiovascular diseases are caused by an unhealthy diet, and therefore nutritional education should be the basis for the prevention of these diseases. According to Marc Lalonde, 53% of our health is caused by diet and lifestyle. Therefore, together with the *Journal of Cardiovascular Development and Disease*, we have created the Special Issue "Diet and Cardiovascular Diseases—Current Views and Trends" in which we would like to publish a number of interesting review papers, original articles and meta-analyses on this very important issue. We invite you to contribute to this unique Special Issue by *JCDD*.

## About the Journal

### Message from the Editor-in-Chief

The primary goal of the *Journal of Cardiovascular Development and Disease* (JCDD, ISSN 2308-3425) is to provide cardiovascular scientists a platform to publish their work in a quick and efficient way. Topics can range from studies designed to decipher the events underlying early heart development to studies focusing on the origins of congenital and acquired heart disease. Papers submitted to JCDD undergo a fast, yet thorough, peer-review process. In this process, we will apply strict ethical policies and standards. JCDD guarantees fast dissemination of results to a large scientific audience

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Cardiac and Cardiovascular Systems) /  
CiteScore - Q2 (General Pharmacology, Toxicology and  
Pharmaceutics)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 28.8 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
