

Special Issue

Complex Percutaneous Coronary Intervention - Indication, Preprocedural Planning, Techniques and Influence on Myocardium

Message from the Guest Editors

The aim of this Special Issue is to explore the field of ischaemic heart disease with a critical focus on complex coronary artery disease, a setting increasingly encountered in clinical practice. Patients with multivessel disease, left main involvement, coronary chronic total occlusions, or severely reduced left ventricular ejection function, often excluded from large trials, pose daily decision-making challenges to both clinical cardiologists and interventionalists or cardiac surgeons. This issue aims to involve different specialists and researchers to provide the latest viewpoints on potential indications, planning strategies, and up-to-date interventional and surgical techniques in the aforementioned patient population.

About the Journal

Message from the Editor-in-Chief

The primary goal of the *Journal of Cardiovascular Development and Disease* (JCDD, ISSN 2308-3425) is to provide cardiovascular scientists a platform to publish their work in a quick and efficient way. Topics can range from studies designed to decipher the events underlying early heart development to studies focusing on the origins of congenital and acquired heart disease. Papers submitted to JCDD undergo a fast, yet thorough, peer-review process. In this process, we will apply strict ethical policies and standards. JCDD guarantees fast dissemination of results to a large scientific audience

Editor-in-Chief

Prof. Dr. Thomas Brand
National Heart & Lung Institute, Imperial College London, South
Kensington Campus, London SW7 2AZ, UK

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Cardiac and Cardiovascular Systems) /
CiteScore - Q2 (General Pharmacology, Toxicology and
Pharmaceutics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 28.8 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
