Risk Factors and Outcomes in Cardiac Surgery: 2nd Edition

Message from the Guest Editor

The field of cardiac surgery has seen remarkable development in recent years, owing to new technological advancements granting room for surgical outcome improvement at the expense of growing procedural complexities. As such, the role of research in identifying procedural outcomes and their related risk factors is proving to be more important than ever.

Through these academic endeavors, we as surgeons are able to draw evidence-based conclusions regarding surgical techniques, identify areas of improvement, and make apt clinical decisions to better serve our often feeble patient population. In this Special Issue of *The Journal of Cardiovascular Development and Disease*, we invite you to contribute your research on procedural outcomes and patient risk factors pertaining to cardiac surgery. We hope that this Special Issue can provide the readers with a comprehensive and up-to-date view of the surgical modalities currently available and offer a forum for in-depth discussions regarding their clinical implications.

About the Journal

Message from the Editor-in-Chief

The primary goal of the *Journal of Cardiovascular Development and Disease* (JCDD, ISSN 2308-3425) is to provide cardiovascular scientists a platform to publish their work in a quick and efficient way. Topics can range from studies designed to decipher the events underlying early heart development to studies focusing on the origins of congenital and acquired heart disease. Papers submitted to JCDD undergo a fast, yet thorough, peer-review process. In this process, we will apply strict ethical policies and standards. JCDD guarantees fast dissemination of results to a large scientific audience

Editor-in-Chief

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Cardiac and Cardiovascular Systems) /
CiteScore - Q2 (General Pharmacology, Toxicology and
Pharmaceutics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 28.8 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
