Recent Advances in Adult Congenital Heart Disease Cardiovascular Medicine

Message from the Guest Editors

Dear Colleague, As you well know, the landscape of adult congenital heart disease (ACHD) cardiovascular medicine is a rapidly evolving field. Worldwide patient complexity is increasing with a parallel increase in the risk of cardiovascular complications and mortality. Proper delivery of clinical care, however, does imply some background knowledge of ACHD-specific cardiovascular features. Proper referral to surgical and transcatheter techniques is pivotal, as is proper timing for referring selected patients to heart transplant centers when necessary. Moreover, new cardiovascular drugs have been developed, tested, and introduced into practice in the acquired cardiovascular disease arena, but limited data exist regarding use of such therapies in our field. To enhance awareness of ACHD as a subspecialty of modern cardiology, this Special Issue aims to collect articles describing different ACHD-related features, including but not limited to research articles and review papers. We would like to propose a specific topic for you, but feel free to modify the title and subject based on your expertise.

About the Journal

Message from the Editor-in-Chief

The primary goal of the *Journal of Cardiovascular Development and Disease (JCDD, ISSN 2308-3425)* is to provide cardiovascular scientists a platform to publish their work in a quick and efficient way. Topics can range from studies designed to decipher the events underlying early heart development to studies focusing on the origins of congenital and acquired heart disease. Papers submitted to *JCDD* undergo a fast, yet thorough, peer-review process. In this process, we will apply strict ethical policies and standards. *JCDD* guarantees fast dissemination of results to a large scientific audience.

Editor-in-Chief

Prof. Dr. Thomas Brand
National Heart & Lung Institute, Imperial College London, South
Kensington Campus, London SW7 2AZ, UK

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Cardiac and Cardiovascular Systems) /
CiteScore - Q2 (General Pharmacology, Toxicology and
Pharmaceutics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 24.7 days after submission; acceptance to publication is undertaken in 3.6 days (median values for papers published in this journal in the second half of 2025).
