Atherosclerotic Cardiovascular Disease: Risk Assessment, Prevention and Treatment Strategies

Message from the Guest Editors

Despite enormous progress in the management of cardiovascular diseases, they are still one of the most important causes of morbidity and mortality in the Western world. This Special Issue will address all these states of atherosclerosis, focusing in particular on risk assessment, prevention, and treatment strategies. Special emphasis will be placed on the recent advances in non-invasive and invasive treatment of atherosclerotic cardiovascular disease as well as novel protocols for the early diagnosis of high-risk patients and the identification of those who will benefit the most from different treatment options. You are kindly invited to contribute original research or a review paper on any aspect related to the topic of this Special Issue. This may also be an opportunity not only for cardiologist and cardiac surgeons but for a broad spectrum of researchers dealing with preclinical or clinical research of atherosclerosis. Prof. Dr. Miran Šebešljen

About the Journal

Message from the Editor-in-Chief

The primary goal of the *Journal of Cardiovascular Development and Disease* (JCDD, ISSN 2308-3425) is to provide cardiovascular scientists a platform to publish their work in a quick and efficient way. Topics can range from studies designed to decipher the events underlying early heart development to studies focusing on the origins of congenital and acquired heart disease. Papers submitted to JCDD undergo a fast, yet thorough, peer-review process. In this process, we will apply strict ethical policies and standards. JCDD guarantees fast dissemination of results to a large scientific audience

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPLus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Cardiac and Cardiovascular Systems) /
CiteScore - Q2 (General Pharmacology, Toxicology and
Pharmaceutics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 28.8 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
