

## Special Issue

# Arrhythmic Risk Stratification in Cardiomyopathies

### Message from the Guest Editors

Arrhythmic risk stratification in nonischemic cardiomyopathies remains challenging for the clinical cardiologist. In the past, ejection fraction has been the indicator for defibrillator implantation in primary prevention. However, today, we know that we need to go beyond ejection fraction. Scientific evidence has documented the importance of genetics and cardiac MRI in proper arrhythmic risk stratification, but there are still many gray areas in this setting. With this Special Issue, we ask you to share your experiences regarding proper arrhythmic risk stratification in patients with cardiomyopathy.

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Thomas Brand  
National Heart & Lung Institute, Imperial College London, South  
Kensington Campus, London SW7 2AZ, UK

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed,  
PMC, Embase, CAPlus / SciFinder, and other databases.

##### Journal Rank:

JCR - Q2 (Cardiac and Cardiovascular Systems) /  
CiteScore - Q2 (General Pharmacology, Toxicology and  
Pharmaceutics )

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 25.7 days after  
submission; acceptance to publication is undertaken in 2.8  
days (median values for papers published in this journal in  
the second half of 2024).
