

## Special Issue

# New Insight into Cardiovascular Disease in Elderly People

### Message from the Guest Editors

Cardiovascular diseases are frequent among elderly patients. It is estimated that 70% of the population over 70 will develop cardiovascular diseases. People older than 65 are more likely to suffer acute coronary syndrome, experience a stroke, or develop coronary artery disease and heart failure. The geriatric population has grown worldwide in recent decades because life expectancy has increased significantly. However, the aged population is underrepresented in clinical trials, and current clinical practice guidelines do not include specific recommendations. They are also a heterogeneous group that ranges from robust and independent individuals to those who may experience additional complications such as polypharmacy, frailty, comorbidities, or inflammation. Thus, in this Special Issue, we welcome contributions focused on various domains related to cardiovascular disease in the elderly, in order to improve the management of elderly patients with acute coronary syndrome and other cardiovascular diseases.

## About the Journal

### Message from the Editor-in-Chief

The primary goal of the *Journal of Cardiovascular Development and Disease (JCDD, ISSN 2308-3425)* is to provide cardiovascular scientists a platform to publish their work in a quick and efficient way. Topics can range from studies designed to decipher the events underlying early heart development to studies focusing on the origins of congenital and acquired heart disease. Papers submitted to *JCDD* undergo a fast, yet thorough, peer-review process. In this process, we will apply strict ethical policies and standards. *JCDD* guarantees fast dissemination of results to a large scientific audience

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Cardiac and Cardiovascular Systems) /  
CiteScore - Q2 (General Pharmacology, Toxicology and  
Pharmaceutics)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 28.8 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
