

Special Issue

Functional Morphology of the Developing and Mature Cardiovascular System

Message from the Guest Editor

Journal of Cardiovascular Development and Disease (JCDD) launches a Special Issue on functional morphology of the developing and mature cardiovascular system. During the past two decades, remarkable advances were made in our understanding of the genetic, molecular and cellular backgrounds of normal and defective cardiovascular functions during prenatal and postnatal life. Such knowledge has, for example, led to a replacement of some of the traditional, morphology-based classifications of human diseases by molecular-based classifications. Due to the remarkable achievements of “molecular medicine”, morphology-based sciences may appear as old-fashioned disciplines, which nowadays may have only a very limited potential to provide new and clinically important insight into cardiovascular functions.

About the Journal

Message from the Editor-in-Chief

The primary goal of the *Journal of Cardiovascular Development and Disease* (JCDD, ISSN 2308-3425) is to provide cardiovascular scientists a platform to publish their work in a quick and efficient way. Topics can range from studies designed to decipher the events underlying early heart development to studies focusing on the origins of congenital and acquired heart disease. Papers submitted to JCDD undergo a fast, yet thorough, peer-review process. In this process, we will apply strict ethical policies and standards. JCDD guarantees fast dissemination of results to a large scientific audience

Editor-in-Chief

National Heart & Lung Institute, Imperial College London, South
Kensington Campus, London SW7 2AZ, UK

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPLus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Cardiac and Cardiovascular Systems) /
CiteScore - Q2 (General Pharmacology, Toxicology and
Pharmaceutics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 28.8 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
