

Special Issue

Feature Review Papers in Epidemiology, Lifestyle, and Cardiovascular Health

Message from the Guest Editors

Cardiovascular diseases are the leading cause of death worldwide and place a substantial medical and economic burden on society. The prognosis of cardiovascular diseases can be improved through prevention programs that include lifestyle changes, the control of modifiable cardiovascular risk factors, and the prevention of intravascular thrombosis. The landscape of cardiovascular prevention is rapidly evolving: in recent decades, thanks to rapid technological improvements, the possibility of making an early diagnosis, stratifying risk, and remotely monitoring cardiovascular patients has significantly increased; therefore, there is a continuous need to develop updated algorithms in order to optimize the use of available resources, improving patient outcomes and limiting medical costs. This Special Issue aims to collect reviews papers on the epidemiology of cardiovascular diseases, diagnostic algorithms, risk factor control, and primary and secondary cardiovascular prevention.

About the Journal

Message from the Editor-in-Chief

The primary goal of the *Journal of Cardiovascular Development and Disease* (JCDD, ISSN 2308-3425) is to provide cardiovascular scientists a platform to publish their work in a quick and efficient way. Topics can range from studies designed to decipher the events underlying early heart development to studies focusing on the origins of congenital and acquired heart disease. Papers submitted to JCDD undergo a fast, yet thorough, peer-review process. In this process, we will apply strict ethical policies and standards. JCDD guarantees fast dissemination of results to a large scientific audience

Editor-in-Chief

Prof. Dr. Thomas Brand

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPLus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Cardiac and Cardiovascular Systems) /
CiteScore - Q2 (General Pharmacology, Toxicology and
Pharmaceutics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 28.8 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
