Epidemiology and Management of Heart Failure in Elderly Population

Message from the Guest Editor

Heart failure prevalence is increasing, now affecting one in every five patients aged 65 and above. Given that the population is aging, heart failure is a major global health problem. Another fact is that the elderly population with its multimorbidity is underrepresented in randomized clinical trials. Thus, there is a paucity of reliable scientific data on the management of heart failure in these patients. Our daily practice is primarily based on the interpolation of results obtained for different healthier patients. The question of whether we should improve the outcomes or improve the quality of life of elderly patients remains. This Special Issue serves as a platform for the exchange of experiences in the epidemiology, pathophysiology, and management of heart failure in elderly populations. You are invited to submit reviews, case reports, and original articles covering any aspect related to the topic of this Special Issue.

About the Journal

Message from the Editor-in-Chief

The primary goal of the *Journal of Cardiovascular Development and Disease* (JCDD, ISSN 2308-3425) is to provide cardiovascular scientists a platform to publish their work in a quick and efficient way. Topics can range from studies designed to decipher the events underlying early heart development to studies focusing on the origins of congenital and acquired heart disease. Papers submitted to *JCDD* undergo a fast, yet thorough, peer-review process. In this process, we will apply strict ethical policies and standards. *JCDD* guarantees fast dissemination of results to a large scientific audience.

Editor-in-Chief

Prof. Dr. Thomas Brand
National Heart & Lung Institute, Imperial College London, South

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPLus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Cardiac and Cardiovascular Systems) /
CiteScore - Q2 (General Pharmacology, Toxicology and
Pharmaceutics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 24.7 days after submission; acceptance to publication is undertaken in 3.6 days (median values for papers published in this journal in the second half of 2025).
