Further Understanding of Myocardial Diseases: From Mechanisms to Treatment

Message from the Guest Editor

Myocardial diseases are abnormalities of the cardiac muscle and can be divided into primary and secondary types. Primary myocardial diseases are mainly related to genetic causes and include different cardiomyopathies (hypertrophic, dilated, restrictive, infiltrative, etc.) and storage diseases. Secondary types of myocardial diseases are mostly acquired (with a potential genetic background) and can be caused by hypertension, valvular heart disease, ischemia, or heart rhythm disease, among other conditions. This Special Issue aims to provide an overview of the latest evidence and close the gaps in the current understanding of myocardial diseases to improve treatment options. Therefore, I welcome the submission of in-depth review articles and innovative original research papers in the important field of myocardial diseases.

About the Journal

Message from the Editor-in-Chief

The primary goal of the *Journal of Cardiovascular Development and Disease* (JCDD, ISSN 2308-3425) is to provide cardiovascular scientists a platform to publish their work in a quick and efficient way. Topics can range from studies designed to decipher the events underlying early heart development to studies focusing on the origins of congenital and acquired heart disease. Papers submitted to JCDD undergo a fast, yet thorough, peer-review process. In this process, we will apply strict ethical policies and standards. JCDD guarantees fast dissemination of results to a large scientific audience

Editor-in-Chief

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPLus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Cardiac and Cardiovascular Systems) /
CiteScore - Q2 (General Pharmacology, Toxicology and
Pharmaceutics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 28.8 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
