Cardiovascular Imaging and Cardiomyopathies

Message from the Guest Editors

In recent years, advances in cardiovascular imaging have expanded our ability to characterize the myocardial abnormalities taking place over the course of different cardiomyopathies. Novel applications of echocardiography, cardiac magnetic resonance imaging, computed tomography and nuclear imaging have been tested, providing information that can potentially lead to early disease diagnosis and improved risk stratification. Furthermore, where new pharmacological treatments should be available, cardiac imaging might potentially be used to track the effects of these treatments on heart morphology and function. The present Special Issue aims to provide a glimpse into the use of cardiac imaging within the broad field of cardiomyopathies. Studies using a multimodality imaging approach, as well as those investigating the prognostic relevance of cardiovascular imaging, are especially welcome.

About the Journal

Message from the Editor-in-Chief

The primary goal of the *Journal of Cardiovascular Development and Disease* (JCDD, ISSN 2308-3425) is to provide cardiovascular scientists a platform to publish their work in a quick and efficient way. Topics can range from studies designed to decipher the events underlying early heart development to studies focusing on the origins of congenital and acquired heart disease. Papers submitted to JCDD undergo a fast, yet thorough, peer-review process. In this process, we will apply strict ethical policies and standards. JCDD guarantees fast dissemination of results to a large scientific audience

Editor-in-Chief

Prof. Dr. Thomas Brand
National Heart & Lung Institute, Imperial College London, South
Kensington Campus, London SW7 2AZ, UK

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Cardiac and Cardiovascular Systems) /
CiteScore - Q2 (General Pharmacology, Toxicology and
Pharmaceutics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 28.8 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
