

Special Issue

Clinical Burden of Comorbidities on Cardiovascular System and Beyond

Message from the Guest Editor

The scope of this *JCDD* Special Issue is to promote a multidisciplinary approach to cardiovascular disease and its burden. Atherosclerosis is a generalized inflammatory process that almost never impacts solely on the heart and coronary system. Recent decades, but also the COVID-19 pandemic, have underlined the importance of comorbidities on cardiovascular disease and outcomes. We seek novel and bold analyses of known and hypothetical but currently untested markers, imaging methods and co-morbidities on the heart and vessels. This Special Issue will provide a platform for the presentation of recent advances in knowledge on the development of cardiovascular disease from diverse scientific disciplines including internal medicine, cardiac surgery, as well as basic sciences and dentistry. The broad focus of the issue will enhance our understanding of the range of cardiovascular disease burden.

About the Journal

Message from the Editor-in-Chief

The primary goal of the *Journal of Cardiovascular Development and Disease* (JCDD, ISSN 2308-3425) is to provide cardiovascular scientists a platform to publish their work in a quick and efficient way. Topics can range from studies designed to decipher the events underlying early heart development to studies focusing on the origins of congenital and acquired heart disease. Papers submitted to *JCDD* undergo a fast, yet thorough, peer-review process. In this process, we will apply strict ethical policies and standards. *JCDD* guarantees fast dissemination of results to a large scientific audience.

Editor-in-Chief

Prof. Dr. Thomas Brand
National Heart & Lung Institute, Imperial College London, South

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Cardiac and Cardiovascular Systems) /
CiteScore - Q2 (General Pharmacology, Toxicology and
Pharmaceutics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 24.7 days after submission; acceptance to publication is undertaken in 3.6 days (median values for papers published in this journal in the second half of 2025).
