Special Issue

10th Anniversary of *JCDD*—Advance in Molecular and Cellular Mechanisms of Cardiac Development

Message from the Guest Editor

Since almost 1 in 100 live births currently suffer heart defects worldwide, there is an urgent demand to develop new strategies to diagnose, identify and cure these congenital heart diseases. We believe understanding the molecular and cellular basis for cardiac development would play a fundamental role in this pursuit. We are excited to launch a Special Issue in the Journal of Cardiovascular Development and Disease, titled "10th Anniversary of JCDD-Advance in Molecular and Cellular Mechanisms of Cardiac Development". This Special Issue pays special attention to the molecular mechanisms during the progression of cardiac development and diseases. We are committed to publishing high-quality research articles, clinical trials, human genetic analysis, and reviews related to this topic.

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Cardiac and Cardiovascular Systems) / CiteScore - Q2 (General Pharmacology, Toxicology and Pharmaceutics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25.7 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2024).
