New Advances in Minimally Invasive Coronary Surgery

Message from the Guest Editor

In the current era, the treatment of patients with coronary artery disease has undergone significant advancements. Minimally invasive coronary surgery has revolutionized the field of coronary bypass grafting and gains a more prominent role in everyday practice. Despite being introduced in the 1990s, recent technological developments have led to an increased adaptation of minimally invasive coronary surgery, making these procedures more accessible and reproducible. For the Special Issue “New Advances in Minimally Invasive Coronary Surgery”, we invite you to contribute a research paper or review article addressing any aspect of this topic, including all minimally invasive approaches. The aim of this Special Issue is to provide an overview of existing techniques and future directions of coronary surgery.

About the Journal

Message from the Editor-in-Chief

The primary goal of the *Journal of Cardiovascular Development and Disease* (JCDD, ISSN 2308-3425) is to provide cardiovascular scientists a platform to publish their work in a quick and efficient way. Topics can range from studies designed to decipher the events underlying early heart development to studies focusing on the origins of congenital and acquired heart disease. Papers submitted to JCDD undergo a fast, yet thorough, peer-review process. In this process, we will apply strict ethical policies and standards. JCDD guarantees fast dissemination of results to a large scientific audience

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Cardiac and Cardiovascular Systems) /
CiteScore - Q2 (General Pharmacology, Toxicology and
Pharmaceutics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 28.8 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
