Transcatheter and Surgical Approaches to Complications of Transcatheter Procedures: Current Trends and Future Challenges

Message from the Guest Editors

Over recent years transcatheter valve, LAAO, PVL and PFO procedures have become a key, minimally-invasive alternative to open-heart surgery for high-risk patients. Success now hinges on modern 3-D imaging, computational planning and fusion technologies, plus evolving devices that improve haemodynamics, simplify steps and cut complications. Yet short-term (mal-positioning) and long-term (device endocarditis) adverse events still threaten outcomes. This issue summarises the latest percutaneous and surgical strategies for preventing and managing these complications, offering heart-team clinicians up-to-date evidence and expert guidance. Original papers and state-of-the-art reviews are welcome.

About the Journal

Message from the Editor-in-Chief

The primary goal of the *Journal of Cardiovascular Development and Disease* (JCDD, ISSN 2308-3425) is to provide cardiovascular scientists a platform to publish their work in a quick and efficient way. Topics can range from studies designed to decipher the events underlying early heart development to studies focusing on the origins of congenital and acquired heart disease. Papers submitted to JCDD undergo a fast, yet thorough, peer-review process. In this process, we will apply strict ethical policies and standards. JCDD guarantees fast dissemination of results to a large scientific audience

Editor-in-Chief

Kensington Campus, London SW7 2AZ, UK

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPLus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Cardiac and Cardiovascular Systems) /
CiteScore - Q2 (General Pharmacology, Toxicology and
Pharmaceutics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 28.8 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
