

Special Issue

Sports Cardiology: From Diagnosis to Clinical Management

Message from the Guest Editors

This Special Issue focusses on sports cardiology, and specifically on exercise recommendations and eligibility criteria for sports participation in competitive athletes with cardiovascular disease and for exercise training programmes in subjects with known or previously undiagnosed cardiovascular disease. We are pleased to invite authors to submit articles covering all aspects of sports cardiology, from diagnosis to clinical management. In order to evaluate and organize the content of the Special Issue, please let us know the preliminary title of your paper, the type of paper that you plan to submit (research article, review or case report) and any other additional information that would be useful. Participation in this Special Issue through the submission of a manuscript could be an excellent opportunity for primary researchers to enrich their CV, for doctoral or post-doctoral trainees to gain experience in writing reviews in Sports Cardiology and for institutions to present their original research in a high-quality journal.

About the Journal

Message from the Editor-in-Chief

The primary goal of the *Journal of Cardiovascular Development and Disease* (JCDD, ISSN 2308-3425) is to provide cardiovascular scientists a platform to publish their work in a quick and efficient way. Topics can range from studies designed to decipher the events underlying early heart development to studies focusing on the origins of congenital and acquired heart disease. Papers submitted to JCDD undergo a fast, yet thorough, peer-review process. In this process, we will apply strict ethical policies and standards. JCDD guarantees fast dissemination of results to a large scientific audience

Editor-in-Chief
