### Message from the Guest Editors

The Journal of Clinical Medicine launched a Special Issue titled "Carotid Angioplasty and Stenting: Current State and Future Directions".

The current literature on the value of carotid angioplasty and stenting in stroke prevention has been rapidly growing each year. Given the importance of CAS in the field of medicine and research, the journal *JCM* is launching this Special Issue.

We encourage you and your co-workers to submit your articles reporting on this topic. Reviews or original articles dealing with the value of CAS on stroke prevention, with the comparison of other treatment modalities such as CEA or conservative management as well as articles providing an up-to-date overview of carotid stenting on carotid stenosis management are particularly welcomed. In addition, we warmly invite you to submit articles reporting on evolving CAS techniques, with a special focus on novel technologies and approaches.
