Message from the Guest Editors

Dear Colleagues,

Digestive cancers are a group of diseases that affect millions, annually causing numerous deaths. Studies published in recent years identified the important role of inflammation in the pathogenesis of all types of cancer, including those of the digestive tract.

We invite you to publish your original research articles, clinical studies, literature reviews, meta-analyses, and clinical cases dealing with the role of inflammation in tumor pathogenesis and disease spread in digestive cancers. Papers can discuss esophageal, stomach, and rectal cancers, including research on inflammatory markers and other useful biomarkers in the diagnosis and prognosis of digestive cancers, the development of new therapeutic targets and new molecules in oncological treatment, and alternatives to standard treatment.

This Special Issue aims to help with the development of new pathogenic mechanisms in digestive cancers, further studying the well-known pathogenic mechanisms, while also helping with the development of new diagnosis methods and new biomarkers for early diagnosis, to establish the most accurate prognosis and, finally, to achieve more effective therapeutic methods.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
