Message from the Guest Editors

Dear Colleagues,

Viral hepatitis is a field of medicine where we have faced enormous advances in the last ten years. Antiviral therapy for hepatitis C and wide implementation of the HBV vaccine in infants are promising a new era without chronic hepatitis in the nearest future. Yet there are challenges remaining; insufficient screening and linkage to care in many countries that are still leaving untreated patients to develop cirrhosis and hepatocellular carcinoma, since patients treated during the advanced fibrosis stages can develop HCC as well. In some risk populations, HCV reinfection is occurring, and we still do not have a cure for hepatitis B. In this Special Issue, we would like to emphasize the importance of recent advances in the field but also address each of the remaining challenges, as well as state-of-the-art research strategies.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
