Message from the Guest Editor

Dear Colleagues,

The management of cardiac arrest has developed a lot in recent decades with the improvement of systems including bystanders in cardiopulmonary resuscitation attempts, with the enhancement of post-resuscitation treatment, and with the introduction of novel interventions such as extracorporeal cardiopulmonary resuscitation (eCPR). The aim of the Special Issue is to focus on hot topics affecting the efficacy of cardiopulmonary resuscitation. Articles to be included will discuss the current state of the art in CPR in trauma and in some special circumstances, e.g., in extreme sport activities, and the application of extracorporeal methods in cardiopulmonary resuscitation. The hotly debated question of target temperature management is also of great interest among resuscitation specialists. It is also important to include articles analyzing the most important studies investigating the effects of target temperature management in post-resuscitation treatment.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
