Deadline for manuscript
submissions:

14 September 2023

Message from the Guest Editors

This Special Issue touches upon the complex topic of spinal cord injury, which involves the expertise of several teams, including neurosurgeons, orthopaedic surgeons, physiatrists, nurses, physical therapists, and occupational therapists, among several others. As such, we are inviting researchers, physicians, and clinical scientists to submit their manuscripts with the goal of advancing the knowledge and understanding around where we currently stand in the diagnosis and treatment of spinal cord injury.

In this Special Issue, we seek manuscripts for their novelty in the treatment and prevention of spinal cord injury. These can be related to the pathophysiology of the spinal cord, neuroinflammatory markers, animal models, nerve and tendon transfers, and the rehabilitation of patients who sustained a spinal cord injury. We are also looking for innovative clinical trials with newly developed drugs and therapies that could bring some new hopes in addition to device-related innovations that could enhance the quality of life of spinal cord injury patients in the spectrum of mobility, bladder function, functional status, and pain.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: *JCR - Q2 (Medicine, General & Internal)* / *CiteScore - Q1 (General Medicine)*
