### Message from the Guest Editor

Dear Colleagues,

We invite you to present original papers and reviews focused on novel pathophysiological and therapeutical approaches in neurodegeneration. The leading cause of dementia is Alzheimer's disease; however, the main goal is to collect insight also from other CNS diseases that share in common the final death of neuronal cells and the failure of neuronal networks. The importance of non-neuronal cells (glial, endothelial cells), extracellular matrix, and novel therapeutical approaches revealing the resilience and the failure of the system are among the main frontiers to be discovered. Clinical research, diagnostic tools, and prognostic factors with novel paradigms are also welcome in our Special Issue.

## Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

## Author Benefits

**Open Access:**— free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

**Journal Rank:** *JCR - Q2 (Medicine, General & Internal)* / *CiteScore - Q1 (General Medicine)*
