Message from the Guest Editor

Dear Colleagues,

Female pelvic medicine and reconstructive surgery (FPMRS) address the treatment of pelvic floor disorders, including fecal and urinary incontinence, vaginal prolapse and pelvic pain.

FPMRS has made significant strides in recent years, with advancements in minimally invasive techniques, regenerative medicine, personalized medicine and a multidisciplinary approach to help women at various stages of life. New medical evaluations include MRI and sonography, and fundamental research can improve the care of patients. Along with several challenges that continue to shape the landscape of this specialized medical and surgical discipline, this topical summary aims to provide an overview of the key advances and challenges in FPMRS, highlighting the progress made and the areas that require further attention.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPUS / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
