Message from the Guest Editors

Dear Colleagues,

The prognosis of adult patients with acute myeloid leukemia (AML) remains poor. The 5-year overall survival rate of AML is approximately 25%, a statistic that has largely remained unchanged over the last decades. In recent years, we have witnessed the advent of several new treatments including targeted therapies, monoclonal antibodies and other immunotherapies. The rapid discovery of novel treatments along with advances in supportive care justify the expectation that the outcomes of AML patients can be finally improved in the near future.

The focus of this Special Issue is to highlight these new advances in the treatment of AML.

Dr. Sébastien Anguille

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
