Message from the Guest Editors

Dear Colleagues,

In terms of neuropsychiatric diseases, Bipolar Disorder (BD) is one of the main contributors to chronic disability throughout the world. Intrinsically, BD is characterized by highly unstable mood and recurring episodes, which are poorly responsive to current available treatment strategies. Indeed, although monotherapy is suggested, the use of several, often unapproved, therapeutic combinations seems the rule. Bipolar depression is particularly unresponsive to treatments. To date, scientific evidence points out some encouraging strategies based on pharmacotherapeutic add-ons or experimental treatments. However, more and more precise and systematic studies are needed in order to shed light on this intricate argument.

The present Special Issue aims at deepening the present knowledge on clinical treatment approaches to Bipolar Depression, based on the ultimate neurobiological physiopathogenetic scientific evidence. This issue will provide a useful tool to address the most fitting therapies for complex cases in everyday clinical practice.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
