Message from the Guest Editor

Sepsis, a life-threatening syndrome characterized by organ failure after infection, is the most common cause of death in hospitalized patients. COVID-19-induced sepsis is a classic example. Therefore, it is crucial to find a new strategy to further investigate the pathogenesis and pathophysiological process for sepsis treatment and new drugs.

In this Special Issue, we welcome original research articles, reviews, opinion, perspective, and systematic reviews, including but not limited to the following themes:

- Investigation of the pathophysiological mechanism and new targets of sepsis
- New drug studies for sepsis
- Investigation of other treatments against sepsis

Keywords

- sepsis
- sepsis organ injury
- immunosuppression
- neutrophil
- neutrophil extracellular traps
- PICS

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
