### Message from the Guest Editors

Dear Colleagues,

Cardiovascular disease (CVD) is the main cause of morbidity and mortality despite significant advancements in preventive strategies, diagnostic methods, and therapeutic approaches over the last few decades. Primary and secondary prevention strategies aim at addressing cardiometabolic risks, optimizing evidence-based therapies, and improving long-term outcome.

Biomarkers provide useful information for early diagnosis, prognosis, and prediction of treatment response, enhance the overall prognostic value of already well-known risk factors, and point to a need to develop new targeted therapies. The development of novel biomarkers and therapeutic targets has greatly accelerated progress toward personalized medicine.

It is our privilege to invite researchers and clinical practitioners to contribute to this Special Issue on Biomarkers for Cardiovascular Risk in the *Journal of Clinical Medicine*. We welcome the submission of original research, review articles, and innovative protocols which highlight recent advances in the use of biomarkers for improving the management of cardiovascular risk.

Prof. Dr. Iwona Świątkiewicz

## Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
