Message from the Guest Editor

Dear Colleagues,

Infectious complications are the main causes of treatment-related morbidity and mortality after chemotherapy and stem cell transplantation. The prevention and treatment of these complications require continuous updates to epidemiological data, the introduction of innovative treatments and new drugs and the constant education of health personnel, patients and caregivers. In this Special Issue, we aim to present data regarding epidemiology, prevention and treatment of infectious complications in the setting of pediatric and adult hematological oncological patients. Reviews of literature on rare infectious complications, expert opinion consensus and guidelines are also welcome.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPUS / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
