Message from the Guest Editor

Dear Colleagues,

Urothelial carcinoma (UC) represents the most common type of epithelial tumor diagnosed in Europe, North America, South America, and Asia. Although around 70–75% of newly diagnosed UC manifests as non-muscle-invasive bladder cancer, it can also involve the renal pelvis, ureter, and urethra. Patients with UC of the upper urinary tract have a 30% to 50% chance of developing cancer of the bladder, while patients with bladder cancer have a 2% to 3% chance of developing cancer of the upper urinary tract. Currently, UC represents a clinical and social challenge because of its incidence, post-treatment recurrence rate, and prognosis. In recent years, the poor diagnostic accuracy of available diagnostic tools such as urine cytology, white cystoscopy, and conventional imaging modalities have emphasized the urgent need for advancement in clinical guidance for UC. Moreover, novel treatment approaches, both medical and surgical, have significantly impacted the management of these patients. This Special Issue presents the up-to-date summaries related to the pathogenesis, diagnosis, prognostic assessment, and management of UC.
Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The Journal of Clinical Medicine's (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal’s full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Medicine, General & Internal) / CiteScore - Q1 (General Medicine)
