Message from the Guest Editor

The treatment of advanced colorectal cancers is still an emerging field. Modern treatment of advanced colorectal cancers includes the combination of the best of both surgical and medical oncology options. Over the last 20 years, the technical development of the different treatment fields has been huge. However, integrating the different treatments into one another to obtain the best result remains complex. This is even more true in the complex situation where there are different treatments for the same disease.

These multimodality treatments come with hope for the patients for a better survival but can also end in a large burden for both patient and healthcare providers. Thus, there is an urgent need for multimodality treatments for a robust scientific backbone.

In this Special Issue, the focus will be on the results of multimodality treatments for advanced colorectal cancer. Of particular will be papers comparing the outcome, complications, and quality of life of different treatments.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
