Message from the Guest Editors

As many of you already know, Degenerative Cervical Myelopathy (DCM) is the most common cause of spinal cord impairment in the developed world, leading not only to a decrease in the quality of life of those affected but also to a growing healthcare burden. Over the past few years, a number of multicentre studies on the topic have emerged, helping to provide a better understanding of the condition. However, it is also clear that much remains to be learned. This is evidenced by the fact that the term DCM was only formally introduced in 2015, guidelines on DCM based on the GRADE process were published in 2017, and, at the present time, an active effort called RECODE-DCM is underway that aims to shape the way future DCM research is carried out. With this Special Issue, we hope to encourage submissions that discuss the current state-of-the-art, address ongoing knowledge gaps, and focus on ongoing controversies related to Degenerative Cervical Myelopathy and the management of the aging spine.

We look forward to receiving your submission.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
