Message from the Guest Editors

The field of regenerative medicine and non-surgical aesthetic procedures is undergoing a remarkable transformation, driven by innovative solutions that significantly enhance patient care and outcomes. These advancements are revolutionizing therapeutic and aesthetic treatments, offering new possibilities for both clinicians and patients.

Regenerative medicine, with its potential to restore and regenerate damaged tissues, is becoming increasingly pivotal in clinical practice. Leveraging the body’s intrinsic healing mechanisms through the use of stem cells, growth factors, and advanced therapy medicinal products (ATMPs), this field promises substantial advancements. Its applications range from wound healing and cartilage repair to the rejuvenation of aging skin, highlighting its broad therapeutic potential.

Non-surgical aesthetic procedures are gaining unprecedented popularity due to their minimally invasive nature and reduced recovery times. Innovations in this domain include advanced dermal fillers, botulinum toxin A injections, laser therapies, and energy-based devices.

Message from the Editorial Board

There has been an explosion of gene and target based
research and therapeutics in the multitude of fields that
compose clinical medicine. The Journal of Clinical
Medicine's (JCM) staff and editorial board are dedicated to
providing cutting edge, timely, and peer-reviewed articles
covering the diverse subspecialties of clinical medicine.
The journal publishes concise, innovative, and exciting
research articles as well as clinically significant articles and
reviews that are pertinent to the myriad of disciplines
within medicine. The articles published are relevant to both
primary care physicians and specialists. The journal’s full-
texts are archived in PubMed Central and indexed in
PubMed. Please consider submitting your manuscripts for
publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or
their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase,
CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General
Medicine)
