submissions:

**30 June 2024**

### Message from the Guest Editors

Dear Colleagues,

The incidence of skin cancers is increasing. Non-melanoma skin cancers (NMSCs) comprise common cutaneous malignancies, together with rare cutaneous cancers. The majority of NMSCs can be successfully treated with surgery. Local flaps and skin grafts are the most common ways to reconstruct a defect after the removal of skin cancer.

Advances and innovations in dermatologic surgery are outstanding, helping to improve complex and various reconstructions, especially new designs and new indications for local skin flaps. Moreover, dermatologic surgeons not only deal with autologous tissue for reconstructive reasons, but also have expertise in the use of innovative alternative materials, such as dermal substitutes, and regenerative medicine.

In this Special Issue, we welcome authors to submit papers relating to surgical innovations in the field of reconstructive dermatologic surgery, as well as any research that aims to improve the knowledge or techniques in this field. Researchers are encouraged to submit their findings in the form of original articles and reviews.

an Open Access Journal by MDPI

## Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
