submissions:

20 July 2023

Message from the Guest Editor

Dear Colleagues,

Brain aging is one of the most tremendous deteriorations during aging. An aberrant form of brain aging—dementia—affects an estimated 50 million older individuals worldwide. Current treatments for cognitive decline and neurocognitive disorders include medications targeting amyloid β , phosphorylated tau, or chronic inflammation, cognitive training, physical exercise, brain–computer interface technologies, etc. These treatments are effective but never radical therapies. For this Special Issue, I would like to invite authors to submit studies focusing on the current and emerging treatment options in cognitive decline and neurocognitive disorders. Authors are welcome to cover other specific topics that have not been mentioned but fall within the theme of the Special Issue.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
