### Message from the Guest Editor

Dear Colleagues,

Shoulder and elbow pain is a common musculoskeletal condition that is recognized as a disabling problem. Some common examples of shoulder and elbow diseases are rotator cuff tears, frozen shoulder, shoulder instability, tennis elbow, bursitis and osteoarthritis. In recent years, shoulder and elbow surgery has undergone improvement due to the emergence of novel surgical techniques and technological approaches, such as arthroscopy and arthroplasty augmented with advancements of biomechanics, biomaterials and regenerative medicine. Given these, it is imperative to keep consolidating our knowledge and disseminate up-to-date information to ensure optimal patient outcomes.

This Special Issue aims to create a platform for sharing expertise, discussing novel approaches and fostering collaboration. Therefore, we invite clinicians, researchers and experts in shoulder and elbow disease to contribute their insights and research findings to a dedicated volume focused on the advancements in the field. We particularly encourage the submission of original research articles and high-interest review articles on this topic.

Dr. Taku Hatta

University of Tokyo, Tokyo, Japan

## Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
