Message from the Guest Editors

Dear Colleagues,

A new SARS-CoV-2 virus causes severe infections resulting in both hospitalization and mortal outcomes or “mild to moderate” infections, for which people with COVID-19 are encouraged to recover at home, often while under little medical supervision. Even though as many as one in ten COVID-19 survivors suffer from long-term sequelae for many weeks or months after clearing the initial infection, this group has not received enough attention in clinical practice and research. The first datasets capturing the COVID-19 health experiences of these self-named “long haulers” were gathered based on these sufferers’ own initiative in the early summer of 2020 using social media. However, we still do not have healthcare structures meeting these patients’ healthcare demands for long-term follow up and rehabilitation.

Therefore, this Special Issue published in the *Journal of Clinical Medicine* will gather up-to-date information on long-term COVID-19 sufferers and, hopefully, will contribute to greater awareness among clinicians, scientists, and researchers.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
