Message from the Guest Editor

Dear Colleagues,

Past research has clearly shown that high mammographic density is both an independent risk factor for breast cancer and masks tumors on a mammogram. However, knowledge regarding how to use this knowledge to improve breast cancer detection and how we could reduce breast cancer risk associated with high mammographic density has been elusive.

In this Special Issue, we are calling for manuscripts that will help to advance our understanding of mammographic density to improve the detection and prevention of breast cancer. We invite original research articles, reviews, and current opinions on all aspects of mammographic density including biology, epidemiology, and clinical medicine.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
