Message from the Guest Editor

Dear Colleagues,

The diagnosis and treatment of salivary gland diseases have experienced a revolutionary development in the last few decades: in the field of salivary gland tumors, the refinement of established diagnostic modalities (e.g. ultrasound-based elastography) has offered additional possibilities for preoperative identification of malignant lesions and optimization of the treatment strategy. In cases with obstructive sialopathy, combined utilisation of established diagnostic (ultrasound) and therapeutic modalities (sialendoscopy, laser) has opened new horizons in the era of minimally invasive approaches to the patient and individualised medicine. Last but not least, the emerging knowledge, the expanding general experience and the increasing expertise concerning the biological behavior of a variety of malignant lesions of the salivary glands (“a changing mosaic”) can only be of significant benefit for our patients.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPUS / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
